

SNP Overview

Mission Advancement 2025

SEAFOODNUTRITION.ORG

SNP Mission, Vision, Strategy

Mission

SNP is a 501(c)3 non-profit with a mission to inspire a healthier America through partnerships and outreach to raise awareness about the essential nutritional benefits of eating seafood.

Vision

For Americans to live happier, healthier, and smarter through seafood nutrition.

Strategy

Build lifelong seafood consumers.

Join SNP to Support Healthier Americans

[Seafood Nutrition Partnership](#) (SNP) is one of the most effective advocates for seafood nutrition for public health. SNP has strengthened the federal recommendations for seafood consumption in the USDA Dietary Guidelines for Americans, FDA seafood guidance for expectant moms, FDA definition of [healthy](#) now includes all seafood, and WIC packages now include more seafood.

SNP is a charitable 501(c)3 non-profit founded in 2013 to inspire a healthier America through partnerships and outreach to raise awareness about the essential nutritional benefits of eating seafood. SNP has volunteer oversight from a [Board of Directors](#) comprised of leaders in food, seafood, public health, and a [Scientific Nutrition Advisory Council](#) comprised of leading scientists in human health and nutrition.

Despite proven benefits, 90% of Americans fail to meet the recommended dietary guidelines of eating seafood at least twice a week. SNP addresses this critical gap through targeted regional consumer campaigns, evidence-based educational outreach, and nutrition policy advocacy. Our organization brings together leading experts from public health, nutrition, sustainability, and science to drive meaningful change.

At SNP, we believe that what we eat directly impacts our health outcomes, and seafood offers a powerful solution to many chronic health challenges. With your support, SNP can further amplify its impact, contributing valuable expertise, resources, and a shared commitment to building a healthier future for all Americans.

Why Eat Seafood?

It's delicious and good for you!

Over 40K studies on health benefits of seafood & omega-3s EPA + DHA.

Seafood supports brain health, heart health, and overall wellness.

People who regularly eat fish are 20% less likely than their peers to have depression.

A third of the brain's key functional units are made up of omega-3 fatty acids found in seafood.

Moms to be who ate seafood had babies with higher IQ. Higher omega-3s DHA can reduce pre-term birth risks.

Eating two servings of fatty fish a week reduces the risk of dying from heart disease by 30-50%

Seafood is a nutrient-packed food with vitamins A, B, and D, Omega3s, selenium, zinc, which helps to reduce inflammation and supports a healthy immune system

SNP Priorities & Programs 2025

- Scale the Fall In Love With Seafood (FILWS) consumer campaign into 2025-2026 with SNP's National Seafood Council Task Force.
- Conduct a FILWS pilot at food service in 2025.
- Continue to strengthen seafood nutrition policy in collaboration with SNP's Scientific Nutrition Advisory Council.

Fall In Love With Seafood @ Retail

- SNP's Consumer Campaign launched in 2024, expanding to more retailers in 2025-2026.
- Goal: Develop a playbook with the NSC Task Force for a national seafood promotion campaign.
